

Deedcoin

Own Deedcoin. Own Your Home.

Americans are giving 6% of their home away on every sale

6% of your house does not belong to you, but rather to your future real estate agent. U.S. property owners hold \$15 Trillion in private property and stand to lose \$900 Billion to future commissions. Through blockchain technology, the real estate industry can be decentralized and streamlined. Deedcoin can return up to \$750 Billion to home owners by tokenizing real estate commission and connecting customers and agents directly.
